Shreya Goel

San Jose, CA | goelshreya0501@gmail.com | linkedin.com/in/shreyagoel0501

Work Authorization: 36 months on F-1 OPT and STEM OPT. No employer sponsorship required to start.

TECHNICAL SKILLS

Languages & Libraries: Python (Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Keras, TensorFlow), SQL, R (Tidyverse, dplyr, ggplot2, caret)

Machine Learning & Analytics: Regression, Classification, Clustering, Time Series Forecasting, XGBoost, Gradient Boosting, Ensemble Methods, A/B Testing, NLP, Sentiment Analysis, Feature Engineering, Statistical Modeling, Data Wrangling, Exploratory Data Analysis (EDA)

Data Visualization & BI Tools: Tableau, Power BI, Excel (Advanced, Pivot Tables), BIRT, Dashboarding, Data Storytelling

Other Tools: Git, Azure (Video Indexer, Foundry), LangChain, MS PowerPoint, Claude Code, GitHub Copilot, ChatGPT

EDUCATION

Santa Clara University, Leavey School of Business — Santa Clara, CA

MS in Business Analytics, GPA 4.0, Dean's List (Spring 2026, Winter 2026, Fall 2025) — *Dec 2026*

- 1st Place, AI Club Project Showcase (2026) | 2nd Place, Fall 2025 Analytics Showdown: XGBoost forecasting model, 89% accuracy | Teaching Assistant: Math for Business & Analytics with R

Christ University — Bangalore, India

BS in Computer Science, Mathematics, and Statistics — *May 2022*

EXPERIENCE

Santa Clara University, Office of Educational Assessment — Santa Clara, United States

Student Ambassador — *Sep 2026 – Present*

- Analyzed longitudinal academic outcomes for a cohort of nearly 500 students across multiple course pathways, producing summary findings used to evaluate a gateway program.
- Validated a Python-based analysis against an independent Excel model, building data-cleaning logic that fixed formatting errors in raw database exports and ensured 100% agreement between methods.

Aquila Clouds — Pleasanton, United States

Marketing Analytics Intern — *Jun 2026 – Dec 2026*

- Designed a 146-column sales pipeline tracking system across 9 deal stages, validating inputs across 42 fields from multiple fragmented data sources.
- Identified and resolved a data-contamination issue affecting ~700 of several hundred B2B account records.
- Conducted win-driver analysis across 5+ variables using chi-square and Fisher's exact tests, quantifying significance and effect size (Cramér's V).

Microsoft — Santa Clara, United States

AI Meeting Effectiveness: Academic Practicum — *Jan 2026 – Jun 2026*

- Built an LLM-driven data pipeline using Azure Video Indexer and Microsoft Foundry to ingest and process meeting transcripts.
- Co-authored a Microsoft Tech Community publication on the Online Meeting Effectiveness Index (OMEI)
- Developed confidence-aware scoring models for quantitative analysis of meeting quality and professionalism.

Deloitte Consulting USI — Mumbai, India

Workday Financials Technical Analyst — *Aug 2022 – Aug 2025*

- Built and maintained 26+ Workday Financials integrations across 3 clients, migrating banking, settlement, and budgeting workflows from PeopleSoft to Workday.
- Wrote XSLT transformations and configured Workday Studio, Core Connectors, and EIBs for Wells Fargo and Bank of America payment integrations, processing hundreds of transactions per cycle.
- Built a BIRT purchase-order report adopted daily by procurement teams, and a BIRT check-printing solution generating a printed check on each payment settlement.
- Ran UAT testing and managed defect resolution through Jira across integration releases.
- Served as Acting Integration Lead for 2 months, supporting the client through go-live.

ACADEMIC PROJECTS

Wine Quality Prediction — Jan 2026 – Mar 2026

- Built a Python and Scikit-learn classification pipeline on ~6,500 wine samples; achieved 0.90 AUC with XGBoost and SMOTE.

AI-Powered Personalization Agent — Jan 2026 – Mar 2026

- Co-built an AI agent using LangChain and retrieval-augmented generation to deliver personalized, context-aware recommendations. Now being extended into a production application with a co-founder.

Hotel Revenue & Cancellation Analytics — Jan 2026 – Mar 2026

- Built a Logistic Regression model finding Group bookings 4.5x more likely to cancel than direct.
